

Coal

Our Coal desks combine strong financial brokerage experience with focused knowledge and insight in coal mining, procurement, production, storage, transportation and marketing.

ICAP's Coal desks in Europe and the US are market leaders for API, Newcastle, Non-OTC and OTC products.

Our industry expertise allows us to source, market and facilitate transactions of standardised and many non-standardised coal specifications and deliveries.

ICAP's US and European Coal desks provide daily pricing sheets, making us industry leaders in unbiased marked-to-market price perspectives. We understand industry information and our transparency eliminates the guesswork in price discovery for each product brokered, providing you with a powerful advantage in the market.

Benefits:

- Experienced brokers available by phone, instant messenger, and email
- Complete full service brokerage from trade analysis, execution, and marking.
- Historical volatility and forward curve data for the most liquid power hubs around the globe
- Customised on-site presentations once a year, tailored to customer need for volume trading, directional trading or hedging
- Daily distribution of power and forward price data together with a regular marking service
- Regular energy market updates

With more than 200 staff across its offices worldwide, ICAP Energy is the energy-focused commodity arm of ICAP plc, providing coverage of base and precious metals, emission credits, crude oil and oil products, electricity, natural gas, coal, freight and weather derivatives.

ICAP Energy is a leading energy broker with operations in the UK, the Netherlands, Norway, Singapore, Australia, Spain and across North America. ICAP Energy has been consistently named Broker of the Year by Energy RISK magazine in a poll of market participants.
